

PREMIUM QUALITY IN EVERY LAYER

We use the finest quality Canadian galvanized steel finished with primer and exterior polyester paint top coats. The paint acts as a barrier protecting the underlying zinc coating. The finished product delivers unmatched quality and extends the life of your garage door.

To maximize stability and thermal insulation value, each door section is filled with 100% CFC & HCFC free polyurethane foam insulation using a continuous computer controlled process. The result is a door which provides superior strength and energy efficiency. The R value is 10.40.

Hardware

We design and manufacture our hardware components to ensure optimum strength, durability and smooth operation of the complete door system.

When purchasing your door, we encourage you to consult your local Steel-Craft dealer on available hardware upgrades and a maintenance schedule that will extend the life of your Steel-Craft door. The Steel-Craft dealer network is available on our website @ www.steel-craft.ca.

Insulation

Polyurethane is our choice of insulation because it boasts important advantages over polystyrene. Its high density composition delivers higher R-value per inch of thickness. Polyurethane offers greater resistance to moisture reducing the risk of mold or mildew. It also possesses dimensional stability and will not soften or melt, remaining strong even at elevated temperatures.

Door Widths

- 8' 9' 10' 12' 14' 15' 16'

The T-12 comes in standard heights of 6.5' through 10', with the standard headroom requirement of 12", however low headroom kits are available for special applications.

Warranty

A multi-level Limited Warranty starting with fifteen years against rust due to the paint finish cracking, splitting or peeling. A seven year warranty against delamination of the polyurethane foam from the steel skin of the garage panel. A one year warranty against defects in material or workmanship on hardware and parts supplied.

Quality

Starting with the finest quality Canadian steel, throughout every stage of our technically advanced finishing process, our number one priority is product quality. When our doors are completed we back them with a 15 year limited warranty.

Value

Steel-Craft continues to invest in the latest manufacturing technology and production efficiencies resulting in exceptional customer value on all our door products.

Lasting Beauty

Our galvanized steel offers a unique combination of superior strength, light weight and corrosion resistance. Zinc coating provides a continuous metallic barrier that does not allow moisture to contact the steel. The coating is improved on by applying exterior polyester paint topcoats. The result is a leading edge garage door that provides years of protection from fading and corrosion.

Energy Efficient

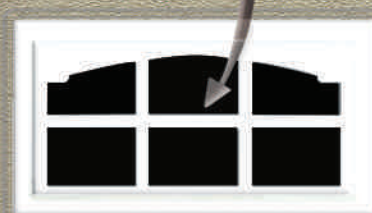

As of January 2003, our polyurethane insulation process is CFC and HCFC free. The elimination of all CFC's and HCFC's from our polyurethane foam insulated doors has resulted in a zero Ozone Depletion Potential and zero Global Warming Potential rating. This is a significant environmental achievement for Steel-Craft Door Products Ltd. and a reflection of our commitment to the environment. No other insulation offers higher R-value resulting in improved energy efficiency for your home.

THERMOCRAFT T-12

The T-12 delivers a winning combination of quality construction, excellent thermal efficiency and timeless beauty.

WEATHER-STRIPPING
Our double finned exterior weather-stripping provides excellent protection from outside elements as well as a crisp finishing touch to the perimeter of your door.

DECORATIVE WINDOWS
Our snap-in design provides easy access for window cleaning and the versatility to change design without replacing the glass unit. The inserts are treated with UV protection paint to help prevent fading. The decorative design features sealed glass units with inlaid muntin bars.

EMBOSSSED WOOD GRAIN PANEL
Our process blends the beauty of wood grain with the durability of steel. Our unique panel design adds visual quality and character to the exterior of your home.

BOTTOM WEATHER SEAL
Our vinyl bulb-shaped bottom seal provides protection against the penetration of outside air, dirt, dust and moisture.

Window Options

We use premium quality glass for all our window applications.
